Introduction of the Gézengúz Foundation - Gézengúz-model

Gézengúz Foundation providing family-focused early childhood intervention for prematures, children with nervous system injuries and for those with altered development or developmental risks.

- Our **objective** is to provide holistic interventional activity in natural living space, including early diagnostics, integrated care, follow-up and prevention.
- Our **target group** is children between 0-7 age, especially children from 0-3 years
- Working in **collaboration** with healthcare – public education and other service providers.

Work of ECI services during the pandemic

The pandemic situation emphasize and confirm the results and message of Agora project

- partly in maintaining relationships in online method *importance of coaching approach*
- partly in the need of ECI professionals' reorganization *importance of resilience*

Double effect – have an influence on changing of ECI sectors

- The extension of social support became a primary need in intersectoral service progress.

How we will continue…?

WP5: Dissemination and exploration

Outcomes of the project

- Guidebook, which will be available on our website in Hungarian
- As a result of the agora - the idea of creating a coaching-oriented workshop's curriculum
- Sharing the main aspects of national cooperation
- Disseminating to ECI partners in our innovation training courses
